

FENSTA BIOGRAPHY

Originating from Fribourg in Switzerland, Fensta is a power trio influenced by the rap and the rock scene. Formed in 2016, the band is characterised by its authentic and extravagant style including elements from alternative and pop music. Inspired by bands such as RATM, Royal Blood or Twetyone Pilotes, Fensta stands out with its compositions blending hip-hop groove, the power of rock, the rap vibe and the singing harmony.

The project is the outcome of a common desire of sharing a simple and energetic music which could draw an audience from all ages, all kinds and nature. It is exclusively with one song that the three founding members of Fensta confirmed their first show in March 2016, which led them to compose a full live set in two weeks only.

A couple of months later, the formation entered the studio "La Fonderie" in Fribourg to record their first album. Their first single "School Dropout" did not go unnoticed by the Swiss media and Cold Smoke Records, the label which released their first album "Apocalystick". After a remarkable release party at the legendary venue "Ebullition", the band appeared on significant stages such as Greenfield Festival, Festi'neuch, Estivale or Bouraks Festival. During this year loaded with significant events, Fensta attracted major media outlets such as RTS, Couleur 3, Radio Fribourg or Le 20 Minutes who gave them the opportunity to play live showcases, give interviews or get reviewed.

In October 2017, Fensta went back to the studio to record their second album "F+" which will be released the 26 January 2018. Actually composed by the singer, guitarist and producer Julien Vonlanthen (worked with Zeela, Dog Days, Hubris, Jo Zarra), the bassist and producer Fred Vonlanthen (worked with Le Bal Du Pendu, Chrystal clear, Alain Morisod) and the drummer and sound engineer Nathan Gros (worked with Hubris, No Way To Escape, Kamasi Washington), the formation releases now its new single « Old School», decidedly true to their original inspirations.
